Sequence 21, Application US/08913441B
Sequence 21, Application US/08913441B
Patent No. 5152612
GENERAL INFORMATION:
GENERAL INFORMATION:
TITLE OF INVENTION: No. 6162612el Human Cyclin-Dependent Kinase-Like Proteins and
TITLE OF INVENTION: Methods of Using The Same
TITLE OF INVENTION: Methods of Using The Same
TITLE OF INVENTION: NUMBER: US/08/913,441B
CURRENT APPLICATION NUMBER: US/08/913,441B
PRIOR APPLICATION NUMBER: US/403,634
PRIOR PLING DATE: 1995-03-14
PRIOR APPLICATION NUMBER: PCT/US96/03557
                                                                                                                                        ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Gaps

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Sequence 56, Application US/08643212
; Sequence 56, Application US/08643212
; Patent No. 6207640
; Patent No. 6207640
; GENERAL INFORMATION:
APPLICANT: Attie, Kenneth
APPLICANT: Carlsson, Lena
APPLICANT: Gesundheit, Neil
APPLICANT: Goddard, Audrey
TITLE OF INVENTION: Treatment of Partial Growth Hormone
TITLE OF INVENTION: Insensitivity Syndrome
NUMBER OF SEQUENCES: 79
CORRESPONDENCE ADDRESS:
ADDRESSEE: Flehr, Hobbach, Test Albritton & Herbert
STREET: Four Embarcadero Center, Suite 3400
CITY: San Francisco
STATE: California
COUNTRY: United States

Patent No. 6825174

GENERAL INFORMATION:

APPLICANT: Nyce, Jonathan W.

IITLE OF INVENTION: COMPOSITION, FORMULATIONS & METHOD FOR PREVENTION

& TREATMENT OF DISEASES & CONDITIONS ASSOCIATED WITH

BRONCHOCONSTRICTION, ALLERGY(IES) & INFLAMMATION
APPLICANT: Nyce, Jonathan W.
TITLE OF INVENTION: COMPOSITION, FORMULATIONS & METHOD FOR PREVENTION
& TREATMENT OF DISSASES & CONDITIONS ASSOCIATED WITH
BRONCHOCONSTRICTION, ALLERGY(IES) & INFLAMMATION
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Gaps

Sequence 1, Application US/08812102

| Sequence 1, Application US/08812102
| Patent No. 5952221
| GENERAL INFORMATION:
| APPLICANT: COLOSI, PETER C. APPLICANT: YOSHIDA, UJN
| APPLICANT: YOSHIDA, UJN
| APPLICANT: MIZUNO, MASAAKI
| APPLICANT: MIZUNO, MASAAKI
| APPLICANT: OKADA, HIDEHO
| TITLE OF INVENTION: GENE THERAPY FOR THE TREATMENT OF SOLID
| TITLE OF INVENTION: TUMORS USING RECOMBINANT ADENO-ASSOCIATED VIRUS VECTORS
| NUMBER OF SEQUENCES: 11
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    ô
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      GENERAL INFORMATION:
APPLICANT: Colosi, Peter
TITLE OF INVENTION: Adenovirus Helper-Free Systems for Producing
TITLE OF INVENTION: Adenovirus Helper-Free Systems for Producing
TITLE OF INVENTION: Recombinant AAV Virions Lacking Oncogenic Sequences
FILE REFERENCE: 2555.2.2
CURRENT APPLICATION NUMBER: US/09/116,780
CURRENT FILING DATE: 1998-07-16
EARLIER APPLICATION NUMBER: 08/745,957
EARLIER APPLICATION NUMBER: 06/006,402
EARLIER APPLICATION NUMBER: 06/006,402
EARLIER FILING DATE: 1995-11-09
WUMBER OF SEQ ID NOS: 11

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  US-09-49-005A-12/C

Sequence 12, Application US/09479005A

Patent No. 6656731

GENERAL INFORMATION:

APPLICANT: Ribozyme Pharmaceuticals, Inc.

TITE OF INVENTION: Nucleac Acid Catalysts with Endonuclease Activity

FILE REFERENCE: MBHB00-884-C

CURRENT APPLICATION NUMBER: US/09/479,005A

CURRENT FILING DATE: 1090-01-07

PRIOR FILING DATE: 1999-11-19

PRIOR PILING DATE: 1999-11-19

PRIOR APPLICATION NUMBER: US 60/059,473

PRIOR PILING DATE: 1997-09-22

NUMBER OF SEQ ID NOS: 1208

SOFTWARE: PatentIn version 3.0

SEQ ID NO 12

LENGTH: 16
       PAPLICANT: Saiki, Randall K.
APPLICANT: Saiki, Randall K.
APPLICANT: Saiki, Randall K.
APPLICANT: Nagarabaddi, Shanavaz L.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         FEATURE:
OTHER INFORMATION: Description of Combined DNA/RNA Molecule:
OTHER INFORMATION: Residues 1-9 are DNA; residues 10-17 are RNA.
OTHER INFORMATION: Residue 10 is cm. Residues 11 and 14 are um.
OTHER INFORMATION: Description of Artificial Sequence: Chimeric
OTHER INFORMATION: DNA/RNA ribozyme sequence
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      1.1%; Score 12.4; DB 1; Length 17; 78.6%; Pred. Sequence 1653, Application US/09371772B

Sequence 1654, Application US/09371772B

Patent No. 6566127

GENERAL INFORMATION:

APPLICANT: Bloczyme Pharmaceuticals, Inc.

APPLICANT: Brinchcomb, Dan

APPLICANT: Brochedo, Jaime

TITLE OF INVENTION: Levels of Vacular Endothelial Growth Factor Receptor

FILE REFERENCE: MBHB00, 876-J (237/198)

CURRENT APPLICATION NUMBER: US/09/371, 772B

FRIOR APPLICATION NUMBER: US 60/005, 974

PRIOR APPLICATION NUMBER: US 08/584, 040

FRIOR APPLICATION NUMBER: US 08/584, 040

FRIOR APPLICATION NUMBER: US 08/584, 040

FRIOR PILING DATE: 1996-01-08

NUMBER OF SEQ ID NOS: 14225

SOFTWARE: PatentIn version 3.0
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       APPLICANT: ALCOYING FIRALMACCULICATE, THE APPLICANT: ALCOYING FIRALMACCULICATE, APPLICANT: ACSWIGGEN, Jim
